

Session A1 (Room A)

Monday 24
10h40-12h45

Chairman: L. Reichel

10h40-11h05	N. Mastronardi <i>On solving KKT linear systems arising in model predictive control</i>
11h05-11h30	W. Krendl <i>An efficient robust solver for optimal control problems for the Stokes equations in the time-harmonic case</i>
11h30-11h55	J. Heiland <i>Optimal control of linearized Navier-Stokes equations via a differential algebraic Riccati decoupling</i>
11h55-12h20	P. Kürschner <i>Recent numerical improvements in low-rank ADI methods</i>
12h20-12h45	L. Smoch <i>A new implementation of the block GMRES method</i>
