Session B7 (Room B)

Tuesday 25
16h30-18h10

Chairman: C. Rosier

16h30-16h55	**A. Duran** *Generation of traveling waves with the Petviashvili method*
16h55-17h20	**P. Deuring** *Eigenvalue bounds for a preconditioned saddle point problem*
17h20-17h45	**V. P. Litvinov** *An multi-step explicit polynomial method for the time integration of the heat conduction equation*
17h45-18h10	**E. M. Vaziev** *An implicit finite-volume TVD method for solving 2D hydrodynamics equations on unstructured meshes*
